

WHY DISTRIBUTION COMPANIES CHOOSE THE LYTX DRIVECAM™ SAFETY PROGRAM

During the decision making process, there are many considerations when evaluating driver risk management, fuel management, and fleet tracking services. Read why companies are choosing the Lytx DriveCam.

“The Lytx DriveCam Program has **changed the culture and behavior of our drivers**. I don’t know if there is anything greater than that.”

FOSTER FARMS

“When you look at all the various technologies that are available to install in your heavy duty fleet today, none of them start with a foundation as solid as Lytx’s that **allow you to truly focus and manage driving behavior**. I think it’s one of the best investments we’ve made in the last five years.”

MONARCH BEVERAGE COMPANY

“When I joined DS Waters as director of safety, I made a commitment to reduce vehicle accident rates across our fleet, but had limited resources to do so and needed to find something that would give me the biggest bang for the buck. I wanted a holistic driver risk management solution that offered more than just training. The Lytx DriveCam safety program enables DS Waters to **reinforce the safe driving habits** we have instilled in our drivers and make them stick.”

DS WATERS

“The Lytx DriveCam safety program isn’t a monitoring system, it’s a behavior system. We were able to change driver behavior with the DriveCam Program; they drive differently, act differently, and handle themselves differently in the vehicles. **We’re very happy with DriveCam.**”

DECRESCENTE DISTRIBUTING COMPANY

“Seeing is believing. With the Lytx DriveCam program, our drivers are seeing risks and areas for improvement more clearly. Ultimately, the drivers appreciate the program and its objectives to **bring the drivers home safely** - that’s a win.”
